

Manuel de Jesús Casas Morales

mdjcasasm02@gmail.com | 55 48 00 69 52 | LinkedIn: Manuel de Jesús Casas Morales

Professional Summary

Applied Mathematics and Computing student with strong analytical skills focused on data analysis, business intelligence, SQL databases, and data-driven decision-making. Experience building dashboards, tracking KPIs, validating data quality, and transforming structured datasets through ETL/ELT processes. Skilled in Power BI, SQL, Excel, Python, and data visualization to support business performance analysis, operational reporting, and insight generation. Upper-intermediate English level (B2).

Education

National Autonomous University of Mexico (UNAM) – FES Acatlán

B.Sc. in Applied Mathematics and Computing
Expected Graduation: June 2026

Relevant Coursework:

Data Analysis and Statistics · SQL Databases · Data Mining · Linear Regression · Business Metrics · Data Structures · Programming (C, Java) · Optimization · Excel for Data Analysis

Experience

Data Analysis & Web Reporting Project – Water Treatment Plant

Academic / Applied Project

Designed and implemented a web-based solution to capture, store, and monitor operational data. Structured historical and current datasets to compare performance indicators before and after implementation. Developed dashboards and visual reports to identify trends, patterns, and operational insights. Improved data accessibility, consistency, and tracking of key operational metrics. Supported data-driven decision-making through KPI monitoring and performance analysis.

Database, OLTP & ETL/ELT Academic Projects

Academic Data Projects

Designed and worked with OLTP database structures for transactional data organization. Applied ETL and ELT processes to extract, transform, load, and validate structured datasets. Developed data transformation workflows to prepare information for analysis and reporting. Worked with data parsing concepts to process and structure raw information. Used SQL queries to extract, filter, join, and analyze information from relational databases.

iOS Development Lab – FES Acatlán, UNAM

iOS Programming Instructor | Oct 2024

Analyzed project progress and performance metrics using structured evaluation criteria. Organized and validated information from 20+ student projects to ensure accuracy and consistency. Prepared reports and follow-up summaries to identify improvement opportunities.

Mobile Applications Development Center (CDAM) – FES Acatlán

Hackathon Organizer | Mar–Apr 2025

Organized datasets to support event planning, execution, and post-event analysis. Supported operational tracking and reporting for a multi-team academic event. Contributed to process documentation and standardized reporting.

Technical Skills

Business Intelligence & Visualization: Power BI, dashboard development, KPI tracking, reporting, data visualization, business insights generation

SQL & Databases: SQL queries, joins, data extraction, relational databases, OLTP structures, data validation

ETL / ELT & Data Processing: ETL/ELT workflows, data transformation, data cleaning, data quality control, data parsing fundamentals

Excel: Pivot Tables, Power Query, XLOOKUP/VLOOKUP, IF, SUMIFS, COUNTIFS, charts, dashboards, data validation

Python: Data processing, basic data analysis, scripting, parsing fundamentals

Additional Technical Skills: React, Spring Boot, HTML, PHP, Git

Certifications

Google Data Analytics Professional Certificate – Google / Coursera (Data Analysis, Data Cleaning, Data Visualization)

Object-Oriented Programming in Swift – UNAM | Hackathon Organization – UNAM

Languages

English – Upper-Intermediate (B2, non-certified) | Spanish – Native

Professional Interests

Business Intelligence & Data Analytics
Power BI Dashboarding & KPI Reporting
SQL Databases, ETL/ELT & Business Performance Analysis
